Science Department Mission Statement

The mission of the science department is to provide a current foundation in the elements of the scientific method, theory, applicability and laboratory practice and to acquire an appreciation of the scientific endeavor.

To accomplish this mission, our department will:

- practice problem solving strategies
- practice cooperative learning using an inquiry based approach
- require students to observe, analyze and apply solutions

In achieving this mission, the department encourages a commitment to the use of science in solving the complex and ever changing problems that stem from worldwide human activities.
